Editorial

The 'Preeminence' An international peer reviewed Journal publishes work that is programmatic, rigorously designed and analyzed, and of great theoretical and practical importance. The works published in this journal are in process of wide citation and include some of the most influential studies in the different fields. The journal has a fairly rapid turnaround time, and the reviews are typically of high quality. As Editor, I am working to ensure all of these positive aspects remain in place, and to make changes that I believe will help the journal maintain its leadership position in the future.

I encourage my authors/contributors whose work includes approaches to submit their best papers. I hope to be able to continue the journal's long tradition of publishing some of the best and most influential papers, while opening the door a bit wider to newer perspectives. In the first issue during 2011, the Journal published 13 articles, written by authors whose primary affiliations include 12 different institutions. As an Editor my strategy is to get maximum feedback in the first submission so that the second submission is ready to be accepted.

To ensure the excellence of 'Preeminence' our editorial team has prescribed acceptance and rejection policy of the submission based on the quality of papers and observations of peer reviewers. The Journal reflects the collaborative efforts of a great team spirit. The Editorial Team Members do a wonderful job in filling the role assigned to them. The Review Committee referees also spared time from their in busy schedules to provide the type of diligent and prompt feedback that continues to play a vital role in the Journal's success. I wish that all the team members of the 'Preeminence' will continue their support to lead the Journal to its pioneer position.
